

ENHANCED OIL RESOURCES, INC. RE-ENTERS AMOS WASH WELL TO INCREASE CO2 PRODUCTION RATE BY 257%

HOUSTON, June 10 /CNW/ - Enhanced Oil Resources, Inc. (TSX-V: EOR) today announced that it re-entered the 11-29-30 well increasing carbon dioxide (CO₂) production to 5.4 million cubic feet per day (MMcf/d) gross from the Amos Wash interval, an increase of 257% from the initial production rate of 2.1 MMcf/d gross.

As a result of the increased productivity achieved in several of the recently drilled Granite Wash wells the Company recently decided to re-enter the 11-29-30 Amos Wash well that had been produced at approximately 2.1 MMcf/d at a flowing pressure of 300 pounds per square inch (PSI) for approximately 7 days during April, 2007. The well was recently re-entered to remove the production tubing from the hole and to log and cleanout the open hole section. The 2 & 9/16" master valve at the wellhead was then replaced with a 7" master valve to reduce potential restrictions during flow back. Following cleanout and flow back the well began to flow up the casing at rates in excess of 5 MMcf/d. The well has since stabilized at 5.4MMcf/d at a flowing pressure of 175 PSI.

The Company is reviewing test data from additional earlier Amos Wash wells in the Field to determine if higher rates could be achieved by redesigning the down-hole configuration of those wells.

Barry Lasker, EOR President and CEO said: "The Company is very pleased with the latest test results from the 11-29-30 Amos Wash well. The increase in production has confirmed that, as with the Granite Wash interval, the Amos Wash interval can deliver at substantially higher rates than previously thought and also confirms that we are on the right track to improving the overall well performance within the Field. This is the highest natural flow rate achieved from the Amos Wash interval to date and, with continued success, could substantially reduce future field wide development costs. We are continuing to review past well performance to see if additional productivity could be achieved from our earlier Amos Wash wells."

About Enhanced Oil Resources

Enhanced Oil Resources, Inc. (EOR) is an early-stage company focused on developing the St. Johns Helium/CO₂ field, and producing oil via enhanced oil recovery processes using CO₂ injection in the United States. The Company owns and operates the St. Johns Field, the largest undeveloped helium and CO₂ field in North America.

Forward-Looking Statement

Certain statements contained herein are forward-looking statements, including statements relating to Enhanced Oil Resources' operations; business prospects, expansion plans and strategies. Forward-looking information typically contains statements with words such as "intends," "anticipate," "estimate," "expect," "potential," "could," "plan" or similar words suggesting future outcomes. Readers are cautioned not to place undue reliance on forward-looking information because it is possible that expectations, predictions, forecasts, projections and other forms of forward-looking information will not be achieved by Enhanced Oil Resources. By its nature, forward-looking information involves numerous assumptions, inherent risks and uncertainties. A change in any one of these factors could cause actual events or results to differ materially from those projected in the forward-looking information. Although Enhanced Oil Resources believes that the expectations reflected in such forward-looking statements are reasonable, Enhanced Oil Resources can give no assurance that such expectations will prove to be correct. Forward-looking statements are based on current expectations, estimates and projections that involve a number of risks and uncertainties which could cause actual results to differ materially from those anticipated by Enhanced Oil Resources and described in the forward-looking statements or information. The forward-looking statements are based on a number of assumptions which may prove to be incorrect. Readers should be aware that the list of factors, risks and uncertainties set forth above are not exhaustive. Readers should refer to Enhanced Oil Resources' current filings, which are available at www.sedar.com, for a detailed discussion of these factors, risks and uncertainties. The forward-looking statements or information contained in this news release are made as of the date hereof and Enhanced Oil Resources undertakes no obligation to update publicly or revise any forward-looking statements or information, whether as a result of new information, future events or otherwise, unless so required by applicable laws or regulatory policies.

ON BEHALF OF THE BOARD OF DIRECTORS

Barry D Lasker, CEO
